

Storage Tips

Leave a path to the rear of the unit. Place frequently used items near door.

Use free-standing shelves. Do not put screws or nails in walls or hang anything from or across walls. Avoid stacking boxes too high.

Clean all furniture, appliances and clothing to remove crumbs, stains and oils. Cover upholstered and wood furniture with cloth, not plastic.

Appliances should be thoroughly clean and dry. Keep freezer and refrigerator doors slightly ajar. Remove vacuum cleaner bags and cover openings.

Store mattresses and box springs on long edges. Wrap with cloth for protection and elevate off floor.

Wrap and crate each mirror, large picture and glass top. Store on edge, not flat.

Bundle long handled tools and tie together. Do not store brooms on their bristles.

Preserve metal items by wiping surface with a cloth containing drops of mineral oil.

Do not store food or items that may attract insects or pests.

Do not store soaps or other aromatics.

Do not store flammable, hazardous, pressurized or toxic materials; nor liquids and aerosols that may spill or burst.

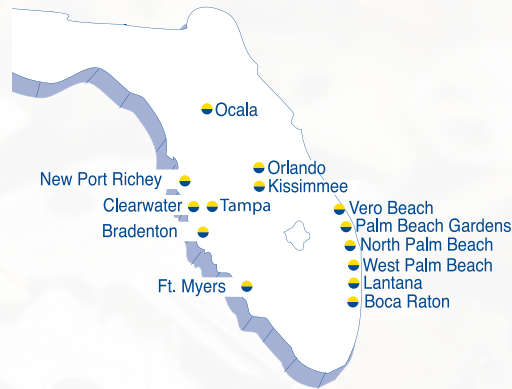

Drain oil and gas from equipment.
